Ryleen Ariyakutty

Software Engineering Student | Behavioral Science Specialist | AI & Accessible Systems

Richmond Hill, Ontario • (250) 661-9418 • Ariyakuttyryleen@gmail.com / www.linkedin.com/in/ryleen-ariyakutty

Canadian Work Authorization: Canadian Citizen • **Clearance Eligibility:** Eligible for Reliability Status / Secret Clearance •

Mobility: Ontario Class G License (Personal Vehicle)

PROFESSIONAL SUMMARY

Emerging Software Engineer with a diverse background spanning customer communications, healthcare logistics, and developmental care, backed by an Honours Bachelor of Behavioural Science and specialized training in Applied Behavior Analysis (ABA). Currently pursuing a B.S. in Software Engineering at Western Governors University, focusing on object-oriented architecture, data tracking systems, and accessible computing interfaces. Combines extensive frontline human-services experience with hands-on AI workflow evaluation and automated testing to engineer secure, user-centric, and data-backed assistive technologies.

CORE COMPETENCIES

Behavioral & Clinical:	Applied Behavior Analysis (ABA), Functional Behavior Assessments (FBA), Individual Support Plans (ISPs), Crisis De-escalation, Person-Centered Care
Software Engineering:	Object-Oriented Programming (OOP), Systems Architecture, Clean Code Practices, Agile Methodologies, Accessible Interface Design
AI, Data & Automation:	Model Testing & Fine-Tuning, Workflow Automation, Edge-Case Identification, Hallucination Reduction, Behavioral Metrics Tracking
Systems & Security:	Cybersecurity Fundamentals, Penetration Testing Concepts, Kali Linux, Shift Logistics & Enterprise CRM Platforms

PROFESSIONAL EXPERIENCE

AI Automator
2026 – Present

Handshake AI — Remote

- Train, evaluate, and benchmark generative AI models and automated workflows, ensuring rigorous output logic, coherence, and adherence to system guidelines.
- Design and execute targeted scenario tests to analyze model boundaries, isolate edge cases, and eliminate behavioral drift and hallucinations.
- Document comprehensive technical evaluations, system safety boundaries, and workflow performance metrics to support ethical and scalable AI implementation.

ABA Instructor Therapist & Behavioral Specialist
2026 – Present

Behavioral Health & Clinical Support Services — Richmond Hill & Greater Toronto Area, ON

- Lead behavioral interventions and crisis management workflows for clients requiring specialized developmental support, ensuring client safety and protocol adherence.
- Conduct Functional Behavior Assessments (FBAs) and systematically translate raw client observation metrics into actionable behavioral treatment plans.
- Apply formalized behavioral science and ABA methodologies to coordinate person-centered care pathways with multidisciplinary healthcare teams.

Student Software Engineer **2026 – Present**
Academic & Applied Engineering Projects Remote

- Develop structured desktop and web-based applications applying modular object-oriented programming principles and standardized design patterns.
- Utilize Agile development methodologies, iterative version control workflows, and unit testing to ensure software maintainability and high code quality.

Developmental Services Worker (DSW) **March 2023 – December 2025** **Marsh Hill Homes** Greater Toronto Area (GTA), ON

- Delivered comprehensive person-centered behavioral and daily living support to individuals with intellectual and developmental disabilities in a residential setting.
- Executed Individual Support Plans (ISPs), recorded quantitative behavioral data, and maintained detailed shift handover and clinical progress documentation.
- Administered prescribed medications strictly adhering to Medication Administration Record (MAR) guidelines and provincial healthcare standards.
- Assisted supported individuals with activities of daily living (ADLs), life-skills development, mobility assistance, and community integration outings.

Child Care Worker **January 2022 – February 2023**
YMCA Greater Toronto Area (GTA), ON

- Planned and facilitated play-based early learning curricula designed to nurture children's cognitive, motor, and social emotional growth.
- Supervised classroom groups and outdoor activities, ensuring strict compliance with YMCA provincial safety, sanitation, and child licensing regulations.
- Maintained transparent daily communication channels with parents and guardians regarding behavioral milestones, daily routines, and learning development.

Scheduling Coordinator **April 2021 – January 2022**
ParaMed Home Health Care Greater Toronto Area (GTA), ON

- Coordinated and optimized dynamic daily field deployment schedules for Personal Support Workers (PSWs) and community health nurses across designated regions.
- Matched specialized client care plans with clinical staff competencies, minimizing service gaps, client wait times, and travel inefficiencies.
- Managed high-volume priority phone escalations, last-minute shift relief, and real-time scheduling adjustments in an enterprise logistics system.

Customer Service Representative **August 2017 – December 2020**
Concentrix Greater Toronto Area (GTA), ON

- Resolved complex client inquiries, technical troubleshooting issues, and account billing disputes via inbound phone, live chat, and email support.
- Maintained consistently superior First Contact Resolution (FCR) rates while meeting stringent quality assurance and customer satisfaction (CSAT) benchmarks.
- Utilized multi-screen CRM software and ticketing platforms to log customer records accurately and expedite interdepartmental escalations.

EDUCATION & ACADEMIC CREDENTIALS

Bachelor of Science in Software Engineering (In Progress) **2026 – Present**
Western Governors University Remote

- Coursework in Object-Oriented Programming, Systems Architecture, and Agile Software Development (Planned progression: M.S. in AI Engineering).

Honours Bachelor of Behavioural Science (HBBS) **2026**

Durham College Durham Region, ON

Social Service Worker Diploma (SSW) **2025**

Durham College Durham Region, ON

TEFL Diploma **2025**

Accredited Certification Program International

AUTHORIZATIONS & TECHNICAL FOCUS

Status & Clearances:	Canadian Citizen • Eligible for Reliability Status and Secret Clearance • Ontario Class G Driver's License with Full Personal Vehicle Access
Technical Focus Areas:	Human-Computer Interaction (HCI) • Accessible Assistive Technologies • Ethical Hacking & Kali Linux • Secure System Design • Applied Behavioral Analytics
